

**Red Hat**

# **Open hybrid cloud connection roadshow**

# How to evolve your infrastructure toward an Open Hybrid Cloud Model

Giorgio Galli  
Cloud Sales Lead

# Infrastructure point of view

## QUALITY

---

Increase your services  
reliability, security

## SPEED

---

Rapidly provide the  
resources needed  
following the velocity  
of business needs

## COST

---

Choice by opportunity  
What and where  
distribute workload  
Scale up and down  
resources

# #1 It's about balancing innovation & optimization through right choice

Optimize the IT  
you have

Integrate apps,  
data, & processes

Add & manage  
cloud  
infrastructure

Evolve existing  
Build more  
modern  
applications

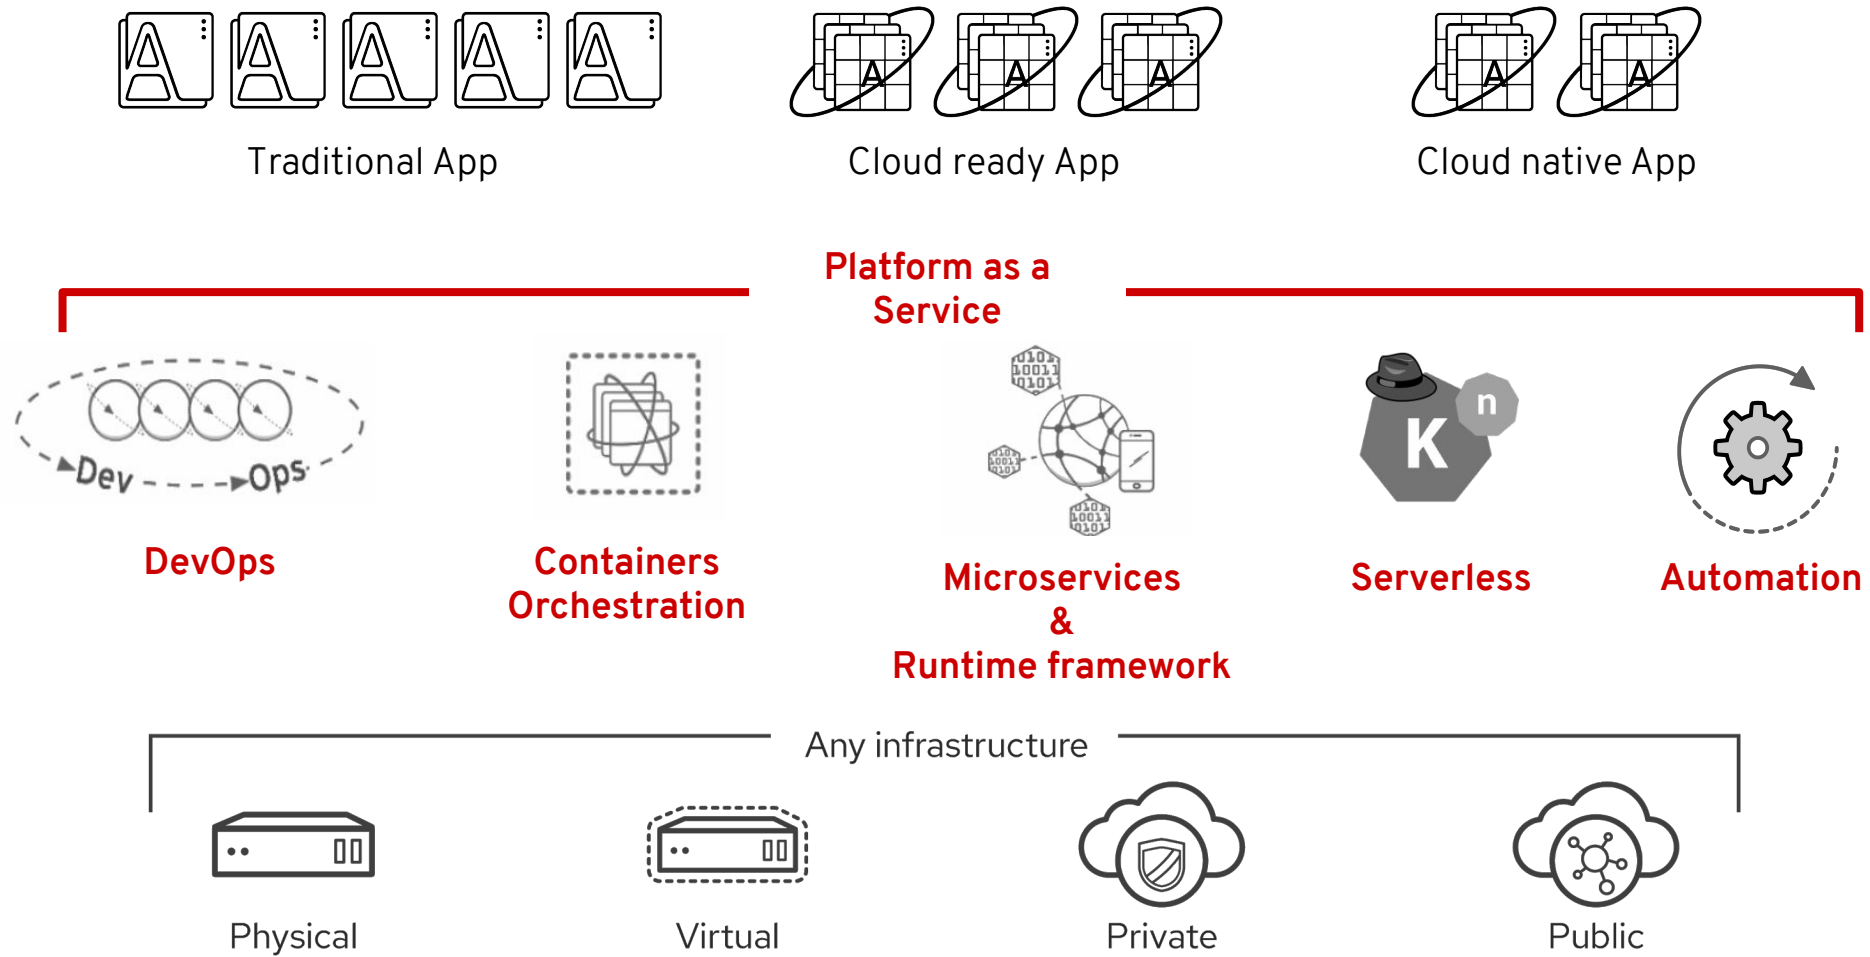

Automate &  
manage IT

People  
Skill

## #2 Decouple Application from Infrastructure with an Open Platform

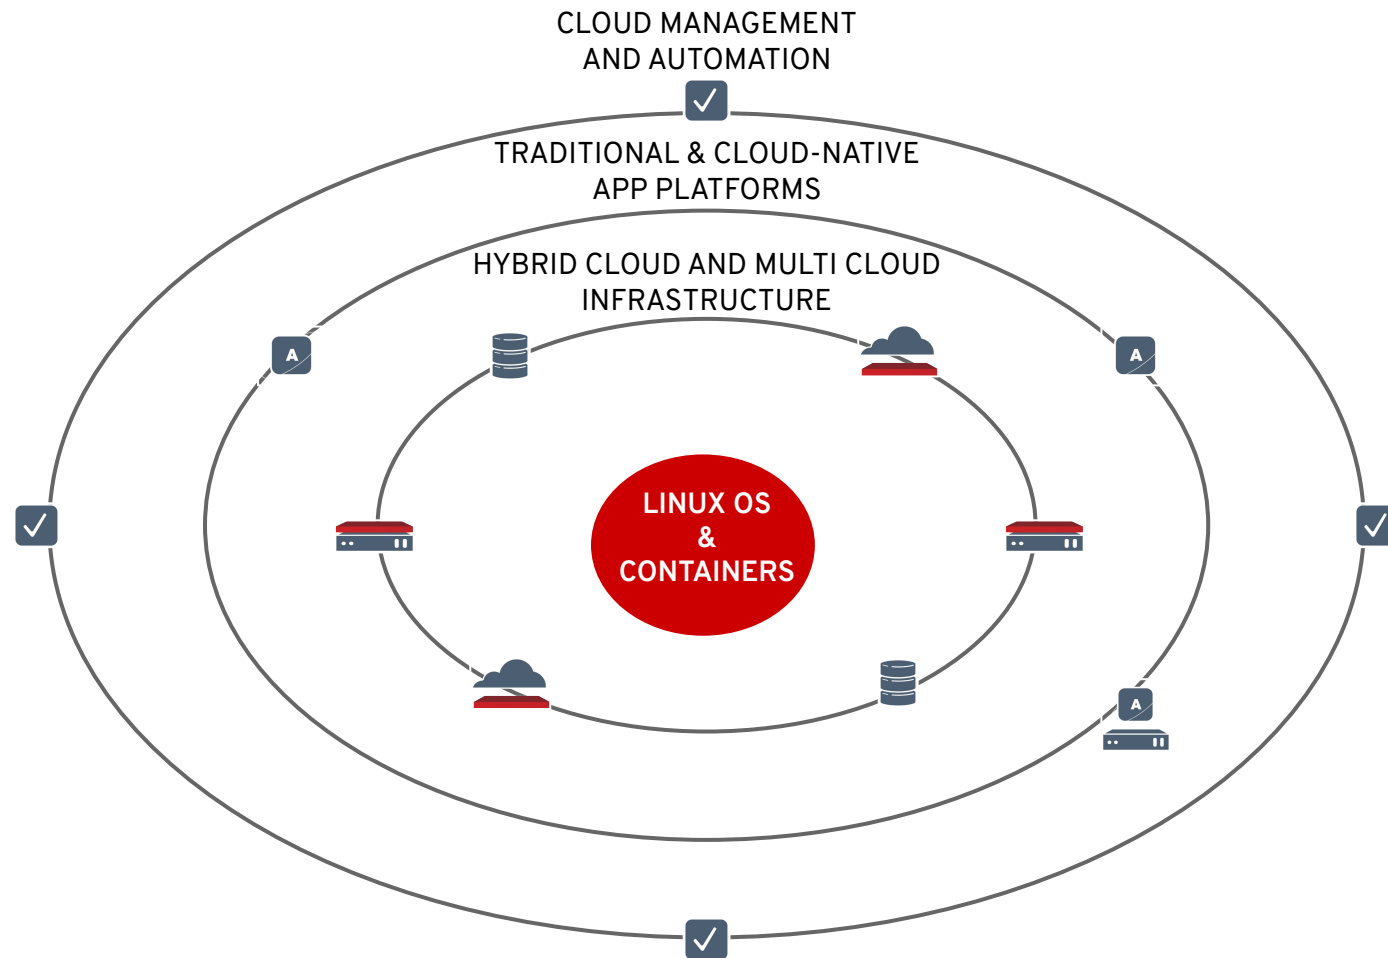

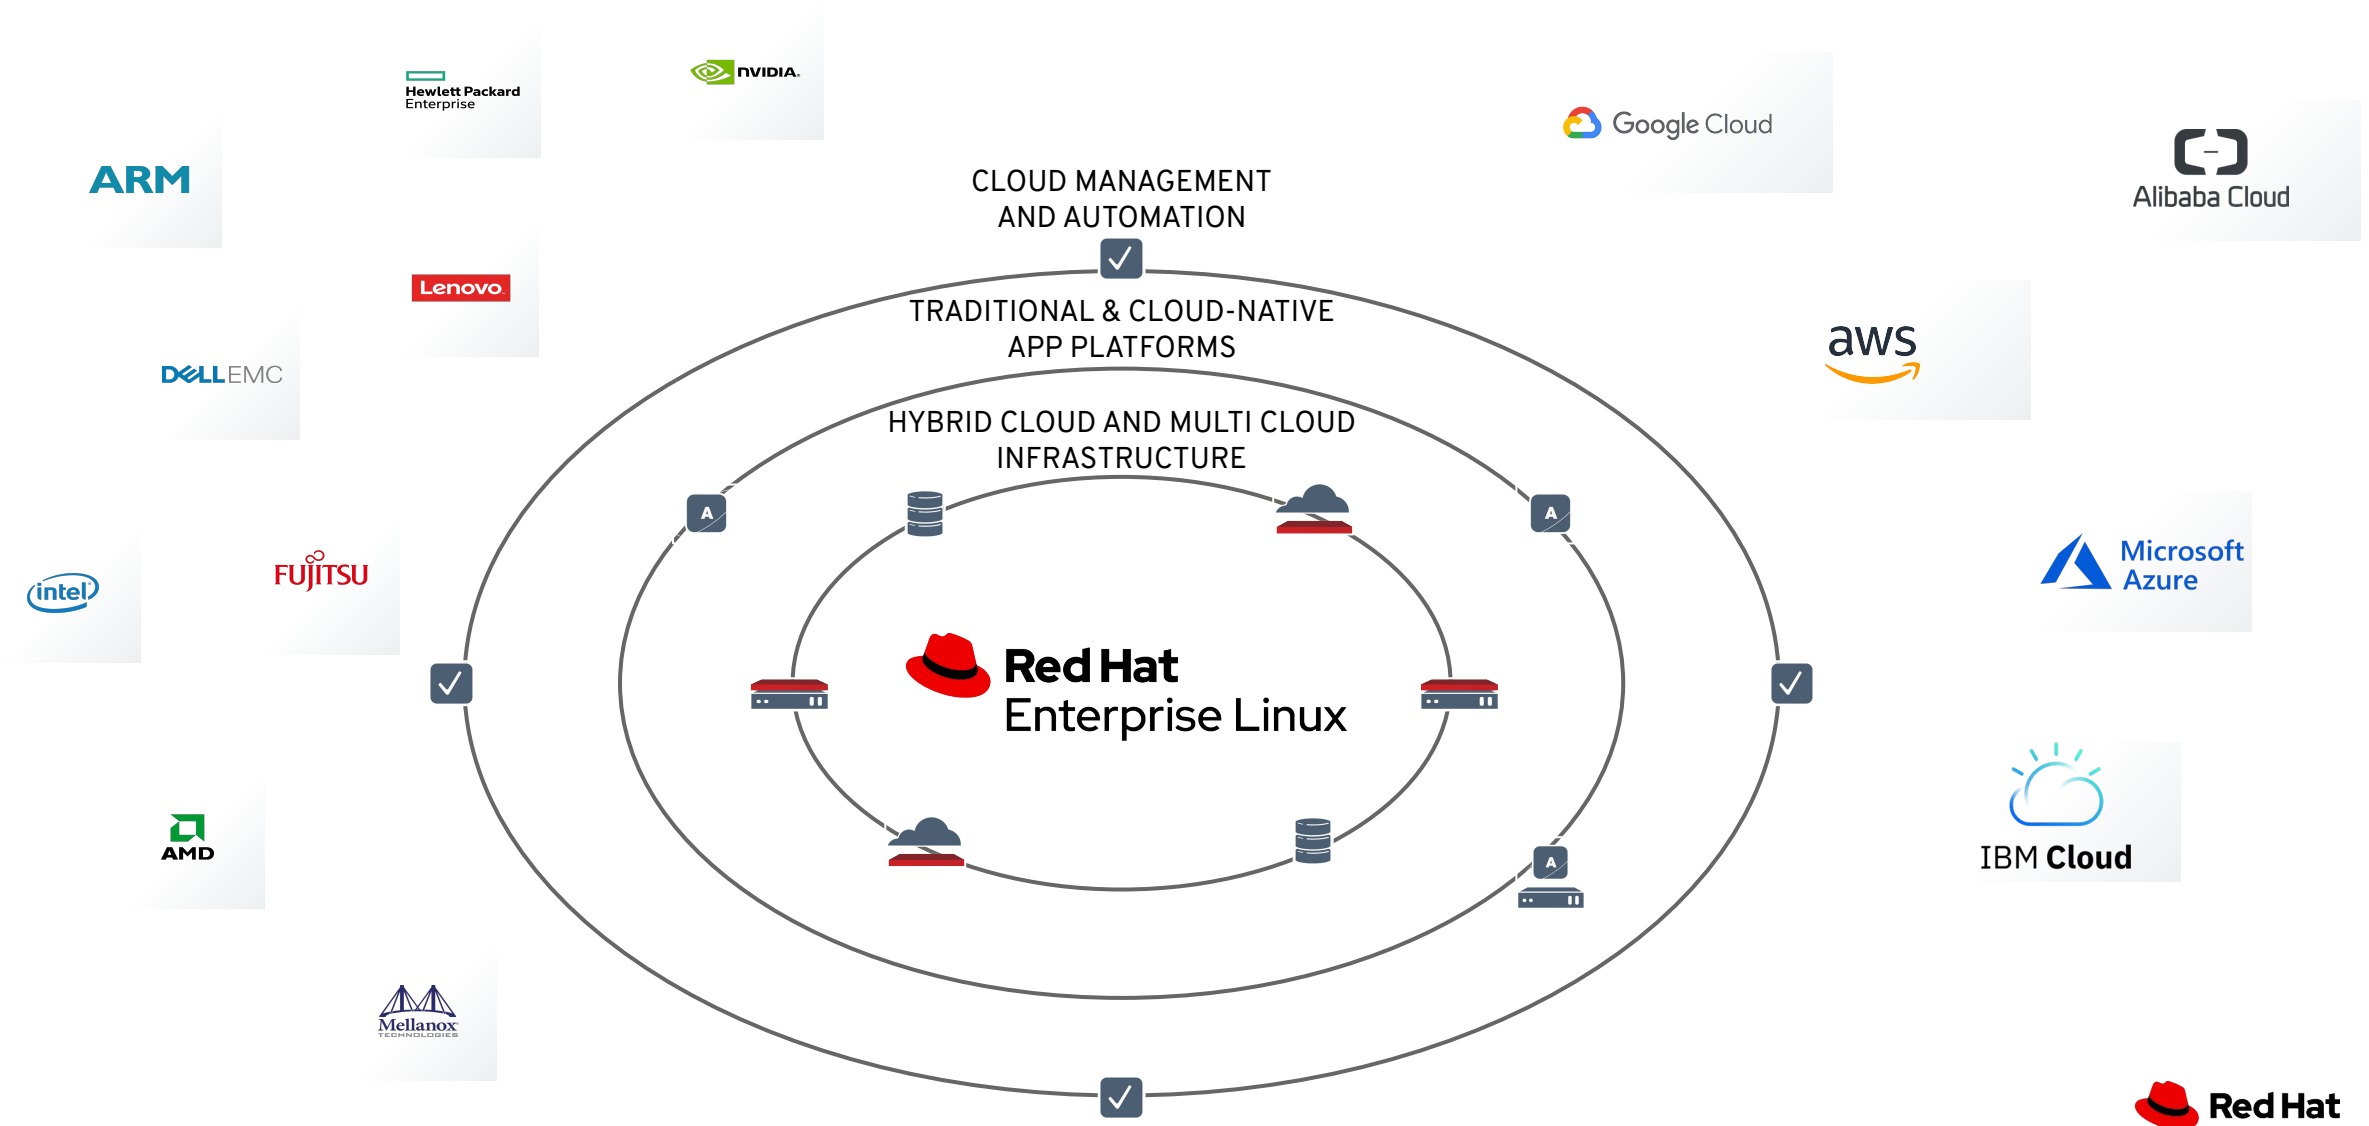

*“Freedom to decide the best place to run your applications - bare metal, virtual, private or public cloud” with the same consistent experience”*

**Red Hat**

# #3 Consistent foundation start from OS

# Red Hat Enterprise Linux: foundation for Open Hybrid Cloud

Bare metal

Hypervisors

Public clouds

Private clouds

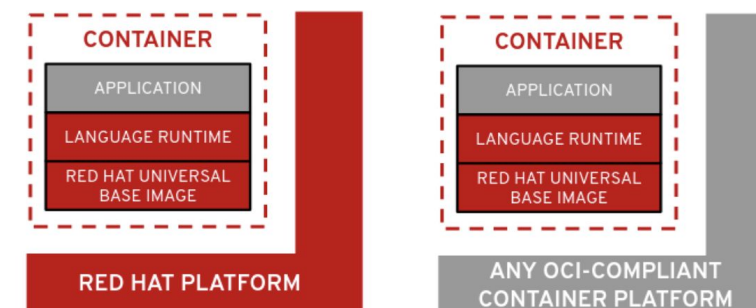

Create images for  
all your  
environments with  
image builder

Powering the adoption of (OCI) Open  
Standard Containerized workload

**Red Hat**  
Enterprise Linux 8

Universal Base Images  
(UBI)

Portability between  
OCI compliant Platform

Operating intelligence Predictive

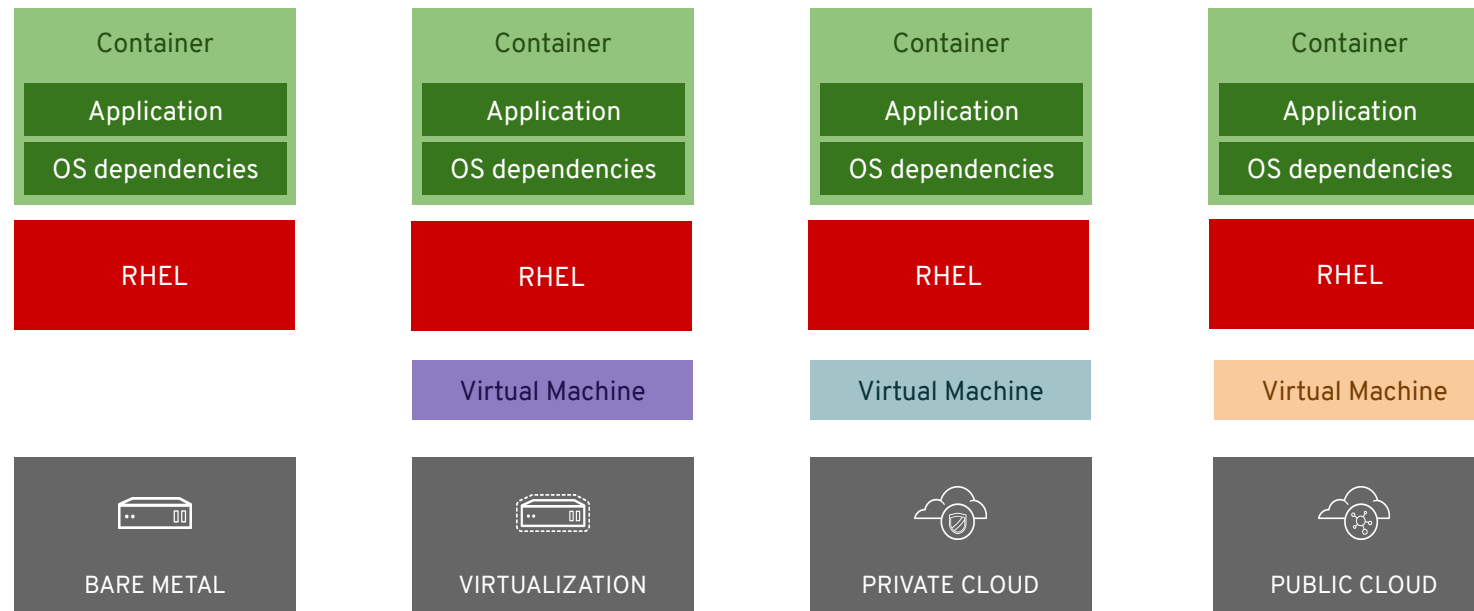

Analyze

Identify

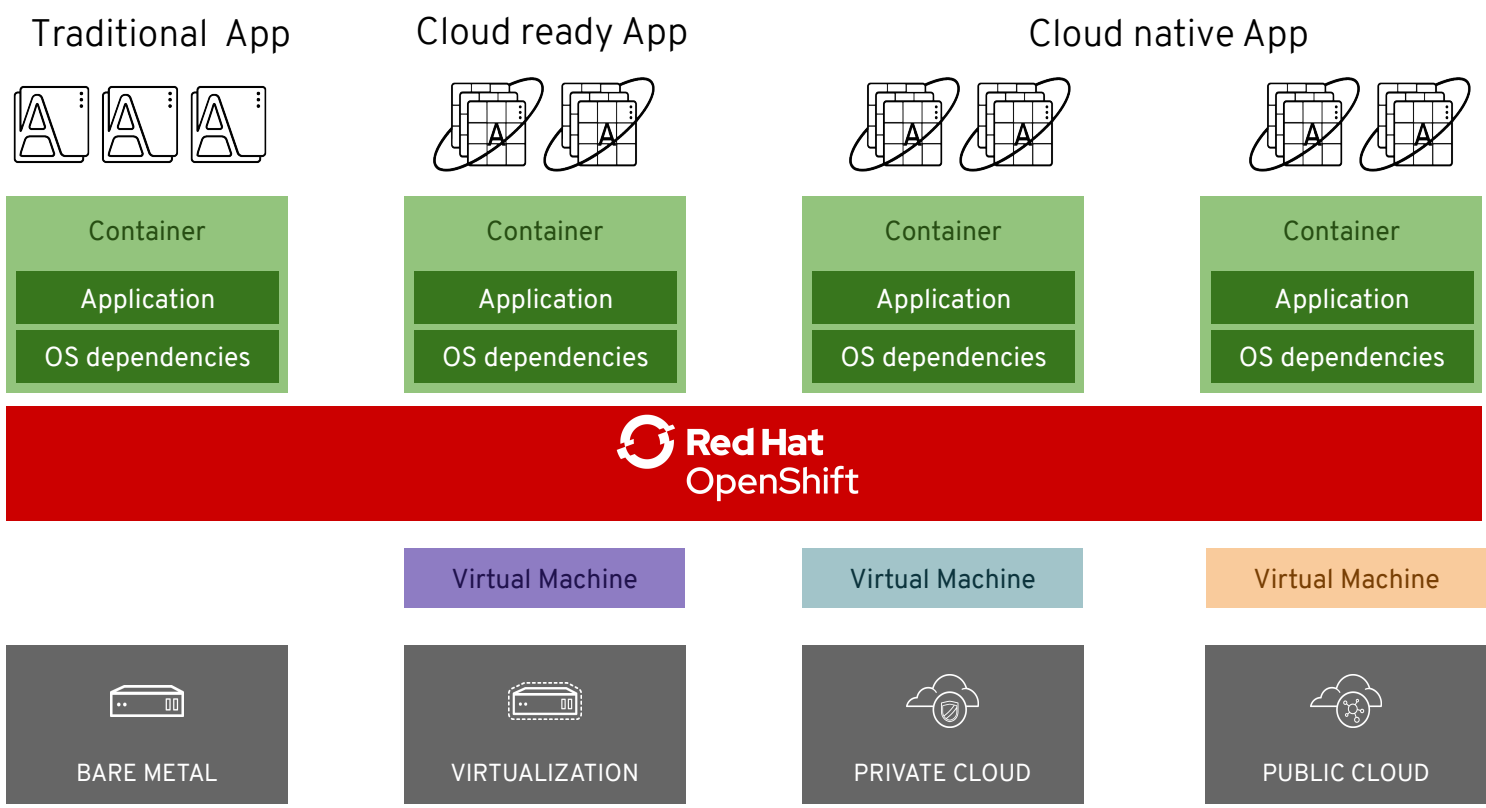

Prioritize

Resolve

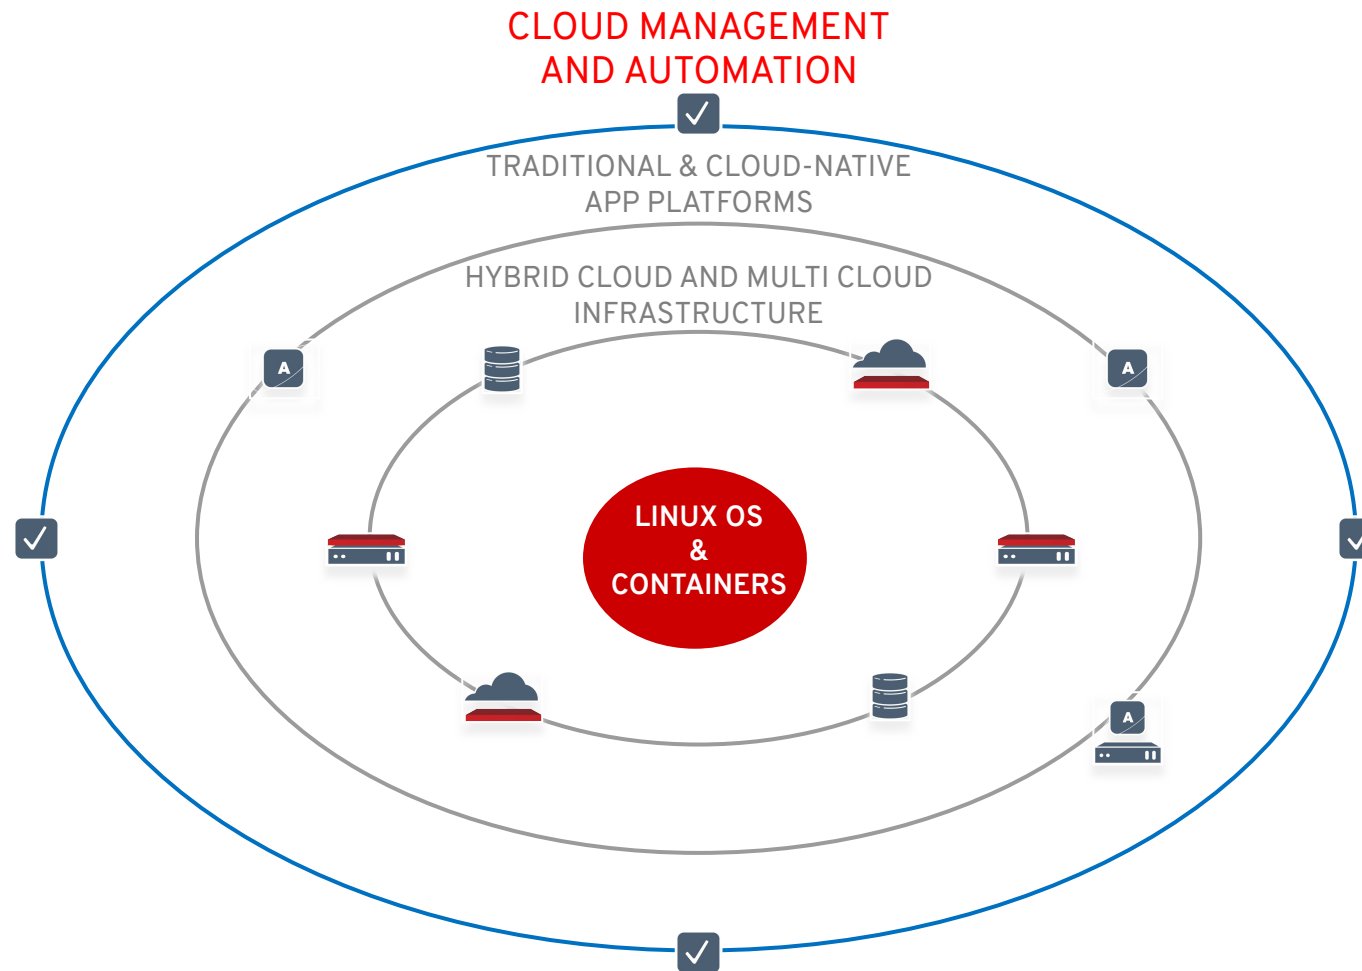

# #4 Containers Enable Hybrid Cloud

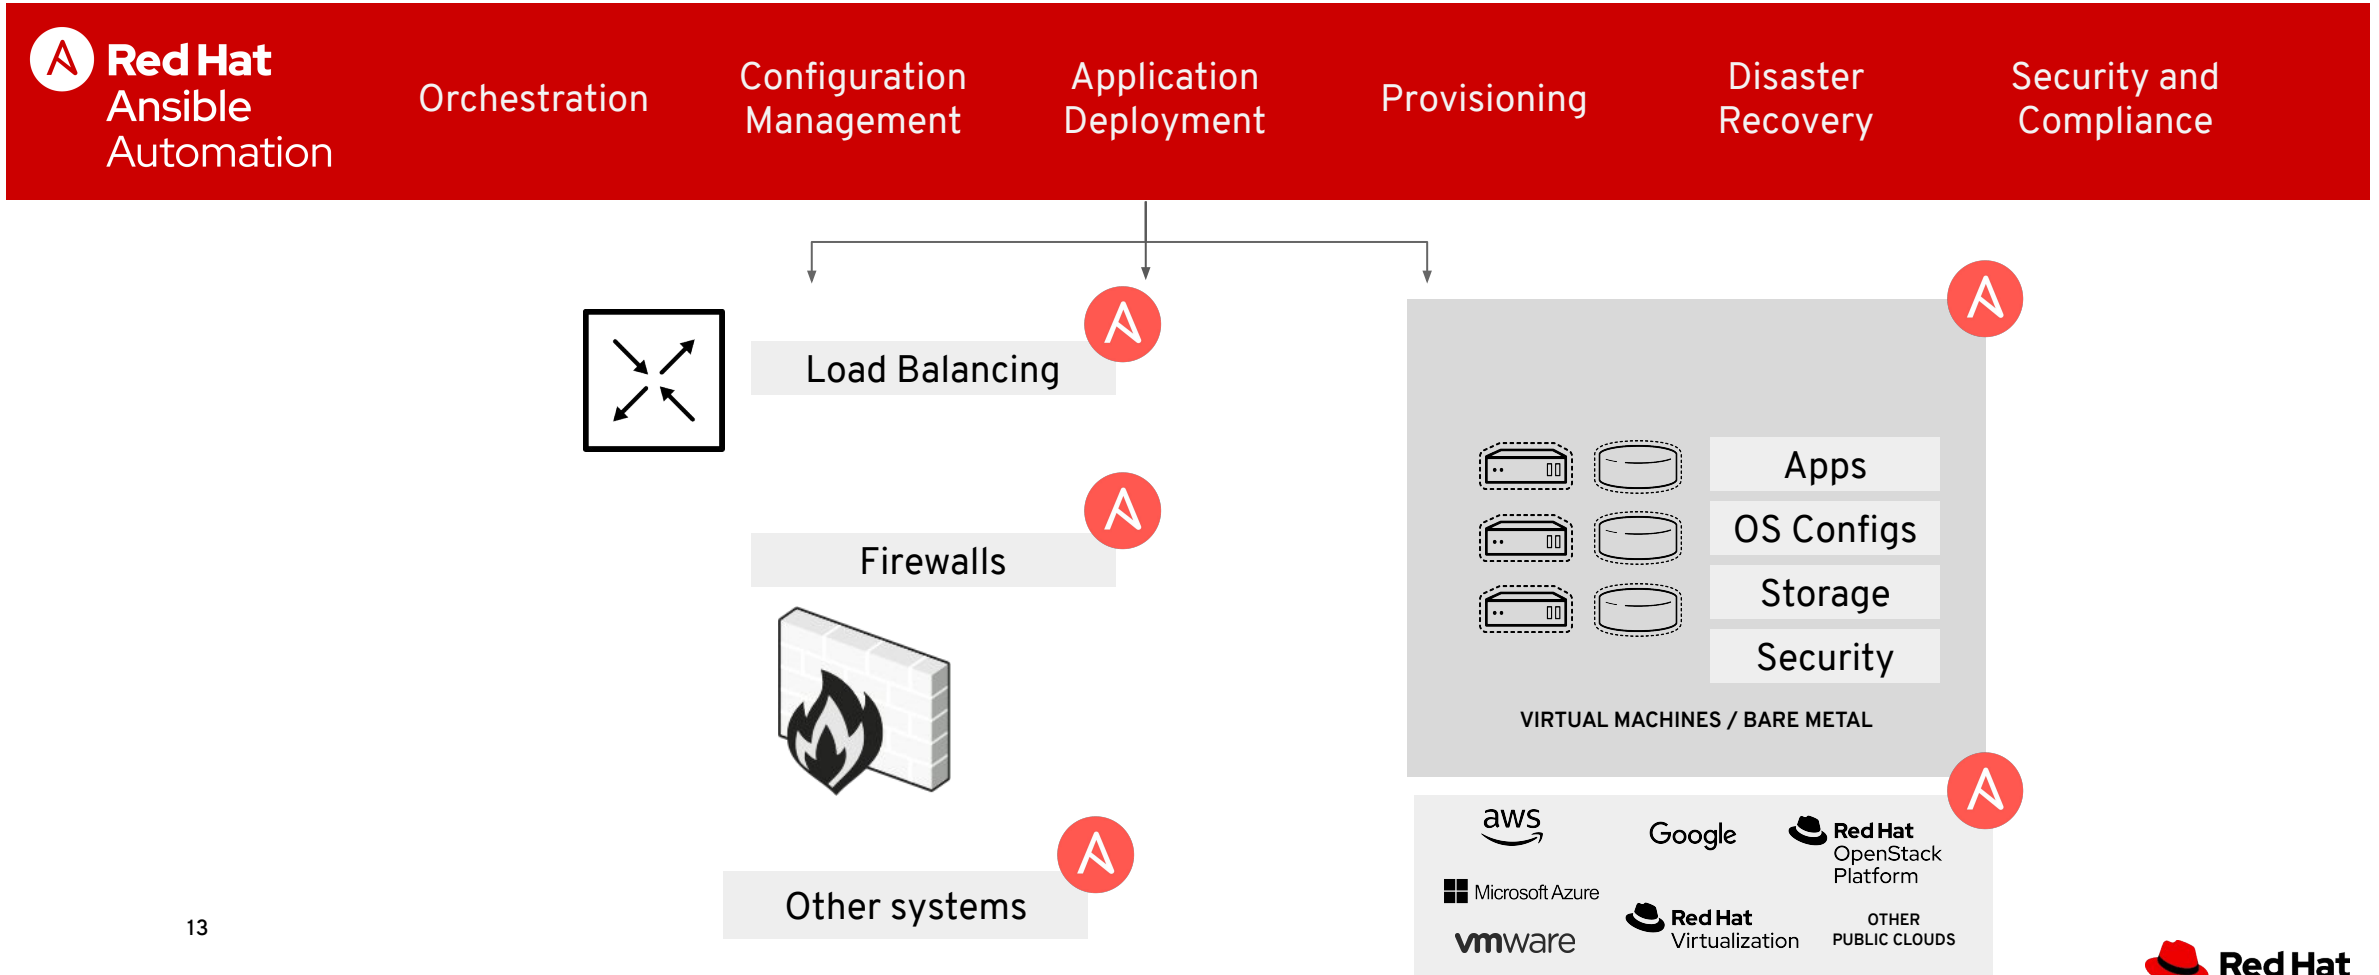

# OpenShift Guarantees Consistent Performance, Reliability And Security Infrastructure

# #5 Hybrid Cloud require Hybrid Automation Capabilities

# Hybrid Automation with Ansible

# IDC: The Business Value of an Agile and Flexible Platform

5 months to payback

54% lower five-year cost of operations

>2x more new applications per year

24% higher application developer productivity

80% less unplanned downtime

49% more efficient IT infrastructure teams

661% five-year ROI

\$32.9 million higher revenue per year per organization

# Red Hat Open Multi-Cloud positioning

# What about Storage in Hybrid scenario ?

How the data management need to evolve in Hybrid Cloud Scenario ?

How storage can support containers applications and which is the value it provide ?

What about Storage in Hyperconverged infrastructure  
Storage in Big Data scenario ?

# Thank you

Red Hat is the world's leading provider of enterprise open source software solutions. Award-winning support, training, and consulting services make Red Hat a trusted adviser to the Fortune 500.
