Hats off to new AUS Red Hat Academy!

April 17, 2017

American University of Sharjah (AUS) recently signed an agreement establishing the American University of Sharjah Red Hat Academy on campus. A Memorandum of Understanding (MoU) to that effect was signed between AUS and Red Hat Academy at a special ceremony held recently on campus. Red Hat, which is an open source, web-deployed and web-managed education program, is designed to provide turnkey curriculum materials to academic institutions to start and sustain an open source and Linux curriculum. This will be the UAE's first-ever Red Hat Academy offering open source computing courses for professionals.

The new AUS Red Hat Academy will function as a center for enterprise-ready talent by providing them with Red Hat training. For more than a decade, Red Hat academies have assisted high schools and institutions of higher education worldwide with hands-on curriculum, labs, performance-based testing, and instructor support.
